

DIGITAL SIGNAGE

Signage that works as hard as your workplace

From the lobby to the breakroom, keep your workplace connected, informed, and inspired.

Static screens don't grab attention anymore. Your workplace moves fast, and your signage should too. Appspace Digital Signage makes it easy to create and share eye-catching content across every screen. With built-in AI, automated publishing, and smart scheduling, you can deliver the right message to the right place at the right time.

HOW IT WORKS

- 1 **Bring wow to any screen**
Stand out with impactful messages that resize to fit any screen.
- 2 **Integrate with ease**
Connect your signage to the tools you already use. Pull in content from your intranet, social feeds, and other systems.
- 3 **Simplify content management**
Save time and effort with ready-made templates, easy design tools, and built-in AI.

Why Appspace?

Unify your messaging

Publish content across global offices or tailor it to specific audiences.

Drive engagement

Turn passive viewers into active participants with stunning content and interactive features that build company culture.

Get critical announcements out the door

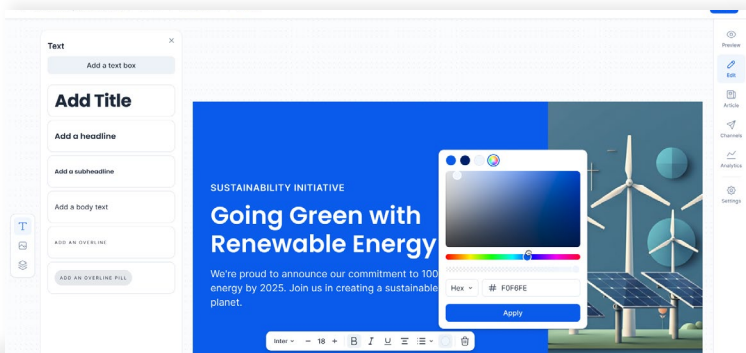

Instantly broadcast urgent updates and notifications across all screens to keep your workforce informed and safe.

Design. Automate. Scale.

Enterprise signage tools for every team.

Appspace combines professional design tools with intelligent automation, so you can deliver the right message at the right time to the right people.

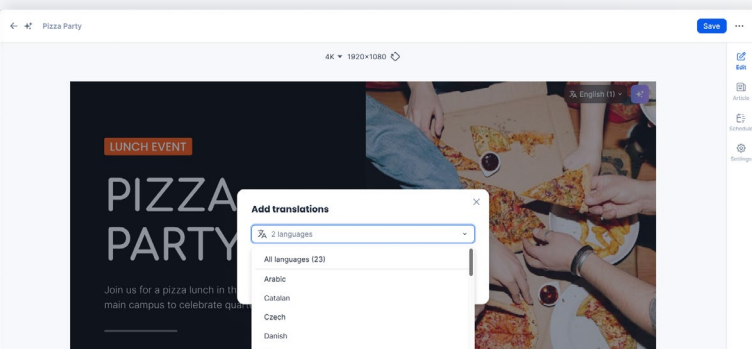

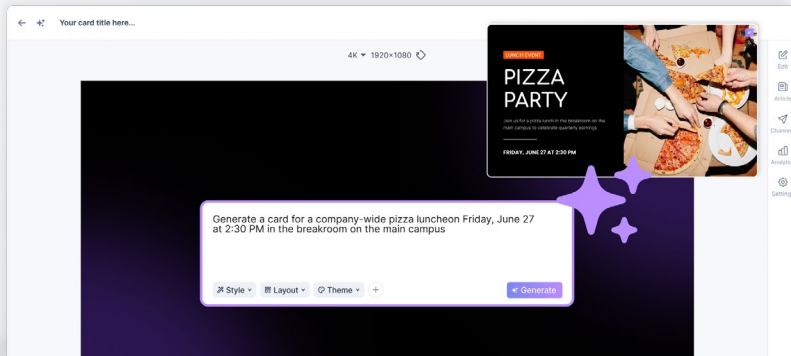

Design with freedom

Ready to design like a pro? **Appspace Design Studio** lets you move things around, resize elements, style text, manage layers, and save templates. So you can get the look you want without switching to another design tool.

Go from idea to screen in a flash with AI

Turn a simple idea into polished digital signage with **Appspace Intelligence**. Just enter a prompt and generate engaging copy, on-brand visuals, and motion-ready designs. **No design skills needed.**

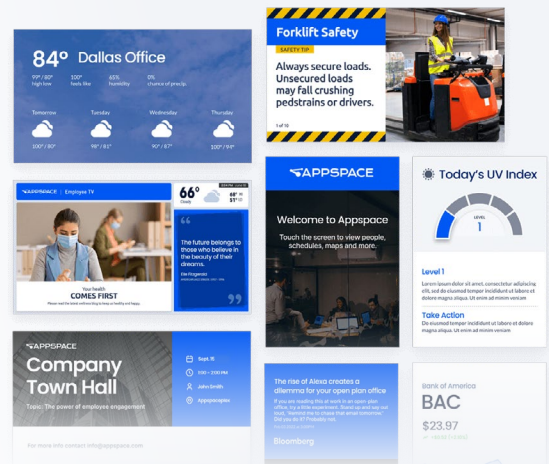

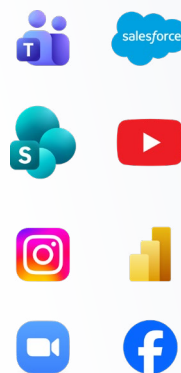

Global reach with instant translation

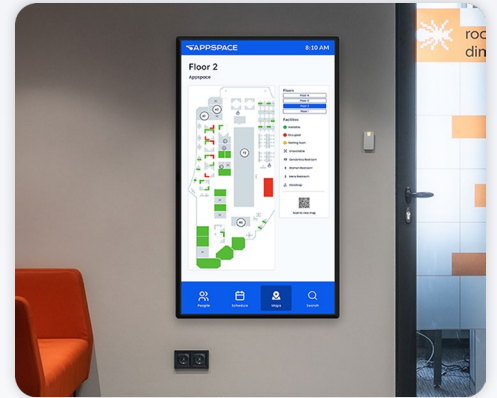

Great communication crosses borders. With **built-in translation**, you can quickly deliver content in multiple languages so your global workforce stays informed and included.

Connect your entire content ecosystem

Appspace connects with the tools you already use – including SharePoint, social feeds, and internal systems. When your content flows freely, everyone stays aligned. Frontline workers get the same updates as office teams, and **your whole team's in the know.**

Every display. Every use case.

From video walls, meeting room signage, kiosks, and everything in between, **Appspace flexes to fit your signage needs.**

Digital Signage Features

HTML templates

Display pre-designed templates for announcements, charts, and content from other tools

Responsive design

Content automatically scales and adjusts perfectly to fit any screen size or orientation

Live streams

Support for HLS and multicast video streams, ensuring high-quality playback across any device

Go interactive

Make your content more engaging with touch screens, QR codes, and real-time interactions from Appspace Intranet

Broadcasts

Override regular content with high-priority information from the CEO, emergency systems, and more

HD & 4K video

Display high-resolution video content on compatible displays

Images

Use common image formats like jpg, png, and gif in templates and channels

Insights & reporting

Tweak your digital signage strategy with data-driven insights into viewer reach and device activity

Simple installation

Set up one device or thousands with enterprise-level registration and configuration options

Manage and monitor with ease

A powerful command center for your entire device fleet

Whether you're managing ten screens in a single office or 10,000 across the globe, Appspace makes enterprise device management easy.

Centralized device control

Register, group, and tag devices by location or department. Assign content to individual displays or entire groups in just a few clicks.

Proactive health monitoring

Stay ahead of issues with real-time device alerts sent by email or webhooks. If a device fails, Appspace notifies your team and can automatically deploy fallback content.

Automated content syncing and device updates

Keep every screen up to date with scheduled syncing and automatic firmware updates — no matter where devices are located.

Remote management

See exactly what's playing on any screen, any time with Device Previews. You can also run system updates and configurations remotely.

Works with the hardware and operating systems you already use

Appspace runs on a wide range of industry-leading devices and operating systems.

Here are just a few.
