Workplace Communications

Appspace Intelligence boosts communication efforts, making it faster and easier to create engaging content. With the power of AI by your side, you can improve your overall content strategy with reliable insights and trends. Foster a positive workplace culture and increase employee engagement with capabilities that make it easier to digest information, ensure appropriate tone, and provide appealing visuals.

Auto-generated content

Supercharge your writing with auto-generated text that provides quick ideas, ensures accuracy, and offers fresh perspectives.

Auto-tagging

Automatically identify and extract relevant keywords from content, so it's easy for employees to discover.

Narration

Deliver announcements and updates in convenient audio segments that employees can listen to while multi-tasking or on the go.

Image generation

Generate the perfect visual to accompany your Pages and Stories. No design expertise needed!

Auto-translation

Make communication between employees a breeze, no matter what language they speak, with translation tools.

Summarization

Analyze employee sentiment, measure engagement, and discover the perfect time to publish your content.

Workplace Management

Appspace Intelligence makes it easy for employees to find the perfect spot and time to collaborate with their colleagues. And with robust analytics and reporting capabilities, facilities managers gain a better understanding of office space utilization. With this info, organizations can implement sustainability initiatives and make the most of their spaces.

Conversational AI

Conversational AI uses historical data, user preferences, and other criteria to recommend the perfect workspace in seconds.

Streamlined hot desking

Automatically reserve or check into a workspace when you connect your laptop to a docking station.

Reporting & analytics

Optimize your physical spaces by turning data into actionable insights related to space utilization and employee behavior patterns.
